TECHNICAL PROJECTS

Alpago Properties (09/2024 - 10/2024)

- Conducted comprehensive testing of the Alpago Properties website, focusing on both the user interface, Admin Side and the CMS (Content Management System) of the website.
- This involved verifying functionality, usability, and performance to ensure a seamless user experience and efficient content management.
- This includes mobile and responsive testing.

SS Lootha Group (08/2024 - 09/2024)

- Performed extensive testing on the SS Lootha Group E-commerce website.
- Functional Testing: Ensured all website features functioned as expected, validating user journeys and workflows.
- Admin Side Testing: Conducted thorough testing of the admin panel to verify content management capabilities and user permissions.
- Regression Testing: Re-tested functionalities after updates to ensure no new issues were introduced.
- Documented and reported defects using task tracking tool Trello, CRM

Fast Marine Boats (05/2024 - 07/2024)

- Ensured all features operated correctly and validated admin management processes. Conducted regression testing post-updates to maintain functionality, documented defects, and collaborated with development teams for resolution.
- Do functional testing and UI testing of the project.

CERTIFICATES

Python 3 (Codecademy)
